

## SHOWER CURTAIN

Before you join the group of people enjoying elegant [shower curtains](#) made of high-quality, natural linen in their bathrooms, you may have questions. We have answers. If you don't see your questions answered here, then let us know. Our team is happy to spend some time helping you make the right decision for your home.

### **How can a linen curtain protect my bathroom from water drops?**

Many of you are concerned that linen curtain won't protect the bathroom from the water, and now we have the solution for that. For additional water protection select the option that includes a durable waterproof liner and enjoy natural quality of your curtain.

### **How do I stop mold from growing on my linen shower curtain?**

Any material not allowed to thoroughly dry between uses is going to develop mold.

It happens with man-made plastic as well as natural, organic materials. Try the following tips to minimize mold and extend the natural beauty and life of your curtain:

- 1.** Hang the curtain so it doesn't touch the floor. That way, your curtain won't absorb moisture from the floor.
- 2.** Whenever possible, allow your curtain to dry between uses.
- 3.** Sometimes we propose curtain and liner are sewn together on the top only, then hang the waterproof liner inside the tub and the linen layer outside the tub. This creates an extra layer of protection between the water and your linen curtain. Message us to add this customization to your order.
- 4.** Even if you follow each of these tips, you still need to occasionally clean the waterproof liner. We recommend using a brush to gently wipe off any debris or water beads.

**Our designers and consultants are happy to help you find a beautiful solution.**

**How many holes does the curtain have?**

Our standard is 12 holes. Contact us if you want to custom order a curtain with a different number of holes.

**Where can I buy the hooks like those on the product picture?**

We're glad you like our display photos! The hooks are available at [Amazon](https://www.amazon.com). There are similar hooks that allow for hanging two curtains at the same time, such as the waterproof liner and linen outer curtain.

**Why can't I see as many color choices for the shower curtain as for other curtains?**

Our linen [shower curtains](#) are a standard 72 inches wide. Some colors don't reach that wide without a seam. That doesn't mean your color scheme is out the window. Our designers and consultants are happy to help you find a beautiful solution. We will work with you to determine the best place to put a seam in your favorite color curtain. We can use either horizontal or vertical seams to create one-of-a-kind designs to complement your bathroom decor.

**I want to use the linen shower curtain for my clawfoot tub. Would a standard 72" wide panel be enough?**

We make custom sizes based on the length of your tub, message us for help with your order.

**Shall I add some width for the fullness of the curtain?**

We usually recommend 1.2 times fullness for the shower curtain.

**I have a circular shower curtain rod, is there a solution for my bath?**

Yes, we make curtains for circular rods as well, and depending on its construction we may propose one or two separate curtains to accommodate the rod.
